W82-02804 1506 6B

MICHIGAN STATE UNIV., EAST LANSING. DEPT. OF AGRICULTURAL ENGINEERING.
Drip Irrigation Uniformity Considering Emitter Plugging,
W82-01860 1504 3F

MICHIGAN STATE UNIV., EAST LANSING. DEPT. OF CIVIL AND SANITARY ENGINEERING.
Mechanics of Mudflow Mobilization in Low-Angled Clay Slopes,
W82-00989 1502 2J

MICHIGAN STATE UNIV., EAST LANSING. DEPT. OF CIVIL ENGINEERING.
Demonstration Testing of Alum Recovery by Liquid Ion Exchange,
W82-01167 1503 5D

Feasibility Studies on Liquid Ion Exchange for Alum Recovery from Water Treatment Plant Sludges,
W82-04107 1509 5E

Densification of Paper Mill Sludge Materials,
W82-04694 1510 5E

MICHIGAN STATE UNIV., EAST LANSING. DEPT. OF CROP AND SOIL SCIENCE.

Photosynthetic Bacterial Production and Carbon Mineralization in a Meromictic Lake,
W82-03403 1508 2H

Yield and Development of Soybeans (Glycine Max L.) as Affected by Irrigation with Municipal Wastewater and Well Water,
W82-03723 1508 3C

MICHIGAN STATE UNIV., EAST LANSING. DEPT. OF CROP AND SOIL SCIENCES.

Cropping Systems for Treatment and Utilization of Municipal Wastewater and Sludge,
W82-00097 1501 5E

The Role of Phototrophic Bacteria in the Sulfur Cycle of a Meromictic Lake,
W82-01831 1504 2H

MICHIGAN STATE UNIV., EAST LANSING. DEPT. OF FISHERIES AND WILDLIFE.

Arsenic in Lake Lansing, Michigan,
W82-03522 1508 5B

MICHIGAN STATE UNIV., EAST LANSING. DEPT. OF GEOGRAPHY.

Rates and Implications of Bluff Recession Along the Lake Michigan Shorezone of Michigan and Wisconsin,
W82-03817 1509 2J

MICHIGAN STATE UNIV., EAST LANSING. DEPT. OF MICROBIOLOGY.

Sulfate Reduction in the Sediments of a Eutrophic Lake,
W82-03722 1508 2H

MICHIGAN STATE UNIV., EAST LANSING. DEPT. OF RESOURCE DEVELOPMENT.

A Procedure Using Modeling and Error Analysis for the Prediction of Lake Phosphorus Concentration from Land Use Information,
W82-00546 1502 5G

MICHIGAN STATE UNIV., EAST LANSING. INST. OF WATER RESEARCH.

Managing Vegetation in Wastewater Application,
W82-03401 1508 5D

Michigan Five-Year Water Resources Research and Development Plan: Fiscal Years 1982-1986.
W82-05530 1511 6B

MICHIGAN STATE UNIV., HICKORY CORNERS, KELLOGG BIOLOGICAL STATION.

Aluminum Sulfate Treatment: Short-Term Effect on Complex Phosphorus Compounds in a Eutrophic Lake,
W82-01833 1504 5F

MICHIGAN STATE UNIV., HICKORY CORNERS. W. K. KELLOGG BIOLOGICAL STATION.

Sulfhydrolase Activity in Sediments of Wintergreen Lake, Kalamazoo County, Michigan,
W82-00241 1501 2H

Reduction of Sulfur Compounds in the Sediments of a Eutrophic Lake Basin,
W82-00488 1501 2H

Methane Formation in the Acid Peats of Okefenokee Swamp, Georgia,
W82-00936 1502 2H

A Bioassay Study of Effects of Zooplankton, Iron and NTA on the Phytoplankton Productivity of a Marl Lake,
W82-01157 1503 2H

Intermediary Metabolism of Organic Matter in the Sediments of a Eutrophic Lake,
W82-06745 1512 5C

Kinetic Analysis of Competition Between Sulfate Reducers and Methanogens for Hydrogen in Sediments,
W82-06886 1512 2H

Comparative Aspects of Sulfur Mineralization in Sediments of a Eutrophic Lake Basin,
W82-06888 1512 5C

MICHIGAN STATE UNIVERSITY, DEPARTMENT OF AGRICULTURAL ENGINEERING.

Cropland, Buffer, and Stream: A Case Study in Agricultural Nonpoint Source Water Pollution,
W82-02728 1506 5G

MICHIGAN TECHNOLOGICAL UNIV., HOUGHTON.

Mathematical Model of Sequential Loading in Fixed-Bed Adsorbers,
W82-05269 1511 5D

MICHIGAN TECHNOLOGICAL UNIV., HOUGHTON. DEPT. OF BIOLOGICAL SCIENCES.

A Study of Biotic Transport of Asbestiform Fibers in Lake Superior,
W82-03950 1509 5B

Effect of Sediment Copper on the Distribution of Benthic Macroinvertebrates in the Keweenaw Waterway,
W82-04030 1509 5C

MICHIGAN TECHNOLOGICAL UNIV., HOUGHTON. DEPT. OF CHEMISTRY AND CHEMICAL ENGINEERING.

Water and Salt Transport in Membranes,
W82-05537 1511 3A

MICHIGAN TECHNOLOGICAL UNIV. HOUGHTON, DEPT. OF CIVIL ENGINEERING.

Ecological Studies and Mathematical Modeling of Cladophora in Lake Huron: 1. Program Description and Field Monitoring of Growth Dynamics,
W82-06939 1512 5C

Ecological Studies and Mathematical Modeling of Cladophora in Lake Huron: 2. Phosphorus Uptake Kinetics,
W82-06940 1512 5C

MICHIGAN UNIV., ANN ARBOR.

Effectiveness of Activated Carbon for Removal of Toxic and/or Carcinogenic Compounds From Water Supplies,
W82-00383 1501 5F

Phosphorus Uptake Dynamics as Related to Mathematical Modeling of Cladophora at a Site on Lake Huron,
W82-01149 1503 5C

Comparative Performance of Synthetic Adsorbents and Activated Carbon for Specific Compound Removal from Wastewaters,
W82-02702 1506 5D

Uncertainty Analysis of a Lake Eutrophication Model,
W82-03711 1508 2H

Simulation of Ice-Cover Growth and Thermal Decay on the Upper St. Lawrence River.
W82-03822 1509 2C

Microscale Patchiness of Nutrients in Plankton Communities,
W82-05613 1511 2H

MICHIGAN UNIV., ANN ARBOR. DEPT. OF ATMOSPHERIC AND OCEANIC SCIENCE.

Petroleum Hydrocarbons in Sediments of Saginaw Bay, Lake Huron,
W82-01141 1503 5A

Fatty Acid and Hydrocarbon Content of Settling Sediments in Lake Michigan,
W82-01154 1503 2H

Southern Lake Michigan Sediments: Changes in Accumulation Rate, Mineralogy, and Organic Content,
W82-01958 1504 2J

A Factor Analysis of Elemental Associations in the Surface Microlayer of Lake Michigan and Its Fluvial Inputs,
W82-03442 1508 2H

MICHIGAN UNIV., ANN ARBOR. DEPT. OF CIVIL ENGINEERING.

A Mathematical Model for Consolidation in a Thermoelastic Aquifer Due to Hot Water Injection or Pumping,
W82-00602 1502 2F

Mathematical Model for Regional Land Subsidence Due to Pumping 1. Integrated Aquifer Subsidence Equations Based on Vertical Displacement Only,
W82-01926 1504 2F

Mathematical Model for Regional Land Subsidence Due to Pumping 2 Integrated Aquifer Subsidence Equations for Vertical and Horizontal Displacements,
W82-01927 1504 2F

Application of Adsorption to Wastewater Treatment,
W82-02622 1506 5D

Investigation of the Accuracy of Water Level Transfer to Determine Geodetic Elevation in Lake Ontario,
W82-03515 1508 2H

Outfall Diffuser Behavior in Stratified Ambient Fluid,
W82-05797 1511 8B

MICHIGAN UNIV., ANN ARBOR. DEPT. OF ENVIRONMENTAL AND INDUSTRIAL HEALTH.

Comparison of In Situ and In Vitro Rates of Methane Release in Freshwater Sediments,
W82-00245 1501 2H

The Contributions of Temperature and the Input of Organic Matter in Controlling Rates of Sediment Methanogenesis,
W82-01832 1504 2H

MICHIGAN UNIV., ANN ARBOR. DEPT. OF ENVIRONMENTAL AND WATER RESOURCES ENGINEERING.

Degradation of Polychlorinated Biphenyls in Sediments of the Great Lakes,
W82-03536 1508 5B

MICHIGAN UNIV., ANN ARBOR. DEPT. OF GEOGRAPHY.

The Thermal Response of Lake Ohrid, Yugoslavia to Meteorological Conditions,
W82-02342 1505 2H

MICHIGAN UNIV., ANN ARBOR. DIV. OF BIOLOGICAL SCIENCES.
How Abiotic Factors Affect the Distribution of Two Species of Tropical Predaceous Aquatic Bugs (Family: Naucoridae),
W82-02633 1506 7A

MICHIGAN UNIV., ANN ARBOR. GREAT LAKES AND MARINE WATERS CENTER.
Inorganic Chemistry of Particulate Matter from the Nearshore Zone of Lake Michigan,

SELECTED WATER RESOURCES ABSTRACTS

ANNUAL CUMULATED INDEXES TO VOLUME 15, 1982

MARCH 3, 1849

PART 2 SUBJECT

SELECTED WATER RESOURCES ABSTRACTS (SWRA) is produced by the Office of Water Research and Technology, U.S. Department of the Interior, and published monthly by the National Technical Information Service (NTIS), U.S. Department of Commerce.

SWRA is available to Federal agencies and their contractors or grantees in water resources research upon request, citing contract or grant number and sponsoring agency. Write: Office of Water Research and Technology, U.S. Department of the Interior, Washington, DC 20240. The **SWRA Journal** is also available on subscription from NTIS, 5285 Port Royal Road, Springfield, VA 22161. Annual subscription rates for the North American Continent are: Journal only, $100; Journal and Annual Indexes, $125; Indexes only, $50. Other addressees, write for prices.

Some documents abstracted in this journal can be purchased from NTIS. Price codes are given in the entries and a current code-price conversion table is printed on the outside back cover. Other documents are available from originating organizations or authors as indicated in the citation.

SELECTED
WATER RESOURCES
ABSTRACTS

A montlhly publication of the Office of Water Research and Technology,
U.S. Department of the Interior

ANNUAL CUMULATED INDEXES TO VOLUME 15, 1982

PART 2 SUBJECT

MARCH 3, 1849

The Secretary of the Interior has determined that the publication of the periodical is necessary in the transaction of the public business required by law of this Department.

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interests of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in Island Territories under U.S. administration.

PREFACE

Selected Water Resources Abstracts, a monthly journal, includes abstracts of current and earlier pertinent monographs, journal articles, reports, and other publication formats. These documents cover water resources as treated in the life, physical, and social sciences and the related engineering and legal aspects of the characteristics, supply condition, conservation, control, use, or management of water resources. Each abstract includes a full bibliographic citation and a set of descriptors which are listed in the **Water Resources Thesaurus.** The abstract entries are classified into 10 fields and 60 groups similar to the water resources research categories established by the Committee on Water Resources Research of the then Federal Council for Science and Technology.

Selected Water Resources Abstracts is designed to serve the scientific and technical information needs of scientists, engineers, and managers as one of several services of the Office of Water Research and Technology. The cumlative SWRA file from 1968 and montlhy updates are available also in magnetic tape through lease from NTIS.

THE OFFICE OF WATER RESEARCH AND TECHNOLOGY DOES NOT PROVIDE COPIES OF DOCUMENTS ABSTRACTED IN THIS JOURNAL. Sufficient bibliographic information is given to enable readers to order the desired documents from local libraries or other sources.

Comments and suggestions concerning the contents and arrangement of this bulletin are welcome.

Office of Water Research and Technology
U.S. Department of the Interior
Washington, D.C. 20240

CENTERS OF COMPETENCE AND THEIR SUBJECT COVERAGE

- Ground and surface water hydrology at the Illinois State Water Survey.
- Metropolitan water resources planning and management at the Center for Urban and Regional Studies of University of North Carolina.
- Eastern United States water law at the College of Law of the University of Florida.
- Policy models of water resources systems at the Department of Water Resources Engineering of Cornell University.
- Water resources economics at the Water Resources Center of the University of Wisconsin.
- Eutrophication at the Water Resources Center of the University of Wisconsin.
- Water resources of arid lands at the Office of Arid Lands Studies of the University of Arizona.
- Water well construction technology at the National Water Well Association.
- Water-related aspects of nuclear radiation and safety at the Oak Ridge National Laboratory.
- Water resource aspects of the pulp and paper industry at the Institute of Paper Chemistry.

Supported by the Environmental Protection Agency in cooperation with WRSIC

- Effect on water quality of irrigation return flows at the Department of Agricultural Engineering of Colorado State University.
- Agricultural livestock waste at East Central State College, Oklahoma.
- Municipal wastewater treatment technology at the Franklin Institute Research Laboratories.

A NOTE ON THE INDEXES . . .

This cumulation is an index of SUBJECTS appearing in the 1982 issue of SELECTED WATER RESOURCES ABSTRACTS. A table is provided below to facilitate the location of abstracts.

Inclusive Abstract Numbers will be found in **Issue Number and Date**

W82-00001—W82-00500	"	**1**	January 1, 1982
W82-00501—W82-01100	"	**2**	February 1, 1982
W82-01101—W82-01600	"	**3**	March 1, 1982
W82-01601—W82-02100	"	**4**	April 1, 1982
W82-02101—W82-02600	"	**5**	May 1, 1982
W82-02601—W82-03000	"	**6**	June 1, 1982
W82-03001—W82-03400	"	**7**	July 1, 1982
W82-03401—W82-03750	"	**8**	August 1, 1982
W82-03751—W82-04250	"	**9**	September 1, 1982
W82-04251—W82-04750	"	**10**	October 1, 1982
W82-04751—W82-05900	"	**11**	November 1, 1982
W82-05901—W82-07000	"	**12**	December 1, 1982

SUBJECT INDEX

3-(TRIFLUOROMETHYL)-4-NITROPHENOL
Persistence of 3-(Trifluoromethyl)-4-Nitrophenol in Aquatic Environments,
W82-01798 1503 5B

ABANDONED COAL MINES
Abandoned Coal Mines in West Virginia as Sources of Water Supplies,
W82-05219 1511 3C

ABATE
Further Observations on the Effect of Abate on Fish Catches,
W82-06722 1512 5C

ABIENOL
Conversion of Abienol into Tetrahydroepimanool by Anaerobic Processes in Woodroom Debarking Effluent,
W82-00860 1502 5C

ABRASION
Cavitation and Wear on Hydraulic Machines,
W82-00331 1501 8C

ABSCISIC ACID
Possible Role of Abscisic Acid in Reducing Seed Set in Water-Stressed Wheat Plant,
W82-03197 1507 2I

ABSORPTION
Absorption of Radium and Thorium From New Mexico Uranium Mill Tailing Solutions,
W82-00040 1501 5D

Absorption of Fenitrothion by Plankton and Benthic Algae,
W82-00874 1502 5B

Open-Pore Polyurethane as a Medium for Coal Conversion Process Aqueous Effluent Cleanup,
W82-01577 1503 5D

Cadmium, Copper, Lead, Zinc and Manganese in the Polychaete Arenicola Marina from Sediments Around the Coast of Wales,
W82-02416 1505 5A

Design, Fabrication and Start-Up of a 25,000 Gallons per Day Absorption Freezing Vapor Compression Desalination Pilot Plant,
W82-04724 1510 3A

Surfactant Adsorption on the Wool Carbonizing Waste (Adsorption De Surfactants Sur Le Dechet Lainier De Carbonisage),
W82-05021 1511 5D

Ammonium Uptake by Micronesian Species of Gracilaria (Rhodophyta),
W82-05311 1511 5G

Hydrodynamic Dispersion During Absorption in a Fine Sand 1. The Constant Concentration Case,
W82-05347 1511 5B

Use of Synthetic Adsorbents in Chemical Processes,
W82-05404 1511 5D

Differential Phosphorus Assimilation in Attached vs. Unattached Microorganisms,
W82-06762 1512 5B

ACCIDENTS
Components for a Treatment Plant Safety Program,
W82-06992 1512 5G

ACCLIMATIZATION
Clonal Variations in the Water Relations of Red Osier Dogwood During Cold Acclimation,
W82-00839 1502 2I

ACCOUNTING
Crisis: Financing Water and Wastewater,
W82-06641 1512 6C

ACCUMULATION
The Effect of Temperature on Salt Uptake by Tomato Plants With Diurnal and Nocturnal Waterlogging of Salinized Rootzones,
W82-00608 1502 2I

Uptake and Transfer of the Chlorinated Hydrocarbon Lindane (Gamma-BHC) in a Laboratory Freshwater Food Chain,
W82-01033 1502 5C

Abiotic Versus Biotic Uptake of Radiophosphorus in Lake Water,
W82-01824 1504 2H

Study of the Transfer of Cd, Pb, Cu and Zn in Neritic and Estuarine Trophic Chains - II. Biological Accumulation in Planktonophage Fish. (Etude du Transfert de Cd, Pb, Cu et Zn dans les Chaines Trophiques Neritiques et Estuariennes-II. Accumulation Biologique Chez les Poissons Planctonophages),
W82-03491 1508 2L

Aquacultural Approaches to Recycling of Dissolved Nutrients in Secondarily Treated Domestic Wastewaters--III. Uptake of Dissolved Heavy Metals by Artificial Food Chains,
W82-04370 1510 5D

Estimation of Accumulation Parameters for Urban Runoff Quality Modeling,
W82-04432 1510 5B

Control of Activated Sludge Filamentous Bulking--IV. Effect of Sludge Regeneration,
W82-05491 1511 5D

Manganese-54 Accumulation by Chlorella SPP., Daphnia Magna and Yellow Perch (Perca Flavescens).
W82-06904 1512 5B

ACID MINE DRAINAGE
Limestone-Lime Treatment of Acid Mine Drainage - Full Scale,
W82-00377 1501 5D

Effects of Surface Mining on Water Quality in a Small Watershed, Sullivan County, Indiana,
W82-00427 1501 5C

The Effect of Pollutants from the Coal Industry on the Fish Fauna of a Small River in the South Wales Coalfield,
W82-01389 1503 5C

Delineation of Acid Mine Drainage Potential of Coal-Bearing Strata of the Pottsville and Allegheny Groups in Western Pennsylvania,
W82-02534 1505 6A

Acid Pond Drainage,
W82-05199 1511 5G

Assessment of Water Quality in Streams Draining Coal-Producing Areas in Ohio,
W82-05234 1511 5B

ACID MINE DRAINAGE, *BIOLOGICAL WASTEWATER TREATMENT
Rotating Disc Biological Treatment of Acid Mine Drainage,
W82-03968 1509 5D

ACID MINE WATER
Mechanism of Charged Membrane Ultrafiltration of Salt Solutions,
W82-00641 1502 5D

ACID PRECIPITATION
Water Characteristics,
W82-01305 1503 5B

Acid Precipitation, A Review,
W82-06794 1512 5C

ACID RAIN
Chemistry of Precipitation at Gainesville, Florida,
W82-00185 1501 2K

Are Sierra Lakes Becoming Acid,
W82-00231 1501 5C

Understanding Acid Rain,
W82-00479 1501 5B

Anthropogenic Trace Elements and Polycyclic Aromatic Hydrocarbon Levels in Sediment Cores From Two Lakes in the Adirondack Acid Lake Region,
W82-00501 1502 5B

Relationships Between Sulfate and Nitrate Ion Concentrations and Rainfall PH for Use in Modeling Applications,
W82-00507 1502 5B

Acid Rain: Facts and Fallacies,
W82-00518 1502 5C

Acid Rain at Kennedy Space Center, Florida: Recent Observations,
W82-00533 1502 5B

Influence of Gaseous Nitric Acid on Sulfate Production and Acidity in Rain,
W82-00642 1502 5B

Acid Precipitation: The Importance of Nitric Acid,
W82-00643 1502 2K

Sulfur and Associated Elements and Acidity in Continental and Marine Rain from North Florida,
W82-00965 1502 2B

Analysis of Precipitation Chemistry at a Central Pennsylvania Site,
W82-00980 1502 2K

A Classification and Description of Some Northeastern Ontario Lakes Influenced by Acid Precipitation,
W82-01145 1503 5B

Aluminum in Precipitation, Streams, and Shallow Groundwater in the New Jersey Pine Barrens,
W82-01297 1503 5B

Water Characteristics,
W82-01305 1503 5B

An Analysis of Acidic Precipitation in South-Central Ontario Using Air Parcel Trajectories,
W82-01513 1503 5B

Recent Acidification of Precipitation in North America,
W82-01514 1503 5B

Acid Precipitation: Basic Principles and Ecological Consequences,
W82-01586 1503 5C

Acid Precipitation,
W82-01607 1503 5C

The Natural Acidity of Some Unpolluted Waters in Southeastern Alaska and Potential Impacts of Acid Rain,
W82-01867 1504 5B

Acid Rain Agreement,
W82-01933 1504 5B

Acid Rain and Environmental Policy,

W82-03727 1508 5D

Factors Regulating the Spatial Distribution of the Filamentous Alga Pithophora Oedogonia (Chlorophyceae) in an Indiana Lake,
W82-04382 1510 2H

Algal Bioassay of the Water from Two Linked but Contrasting Welsh Lakes,
W82-04934 1511 2H

Carbon Limitation of Biomass Production in High-Rate Oxidation Ponds,
W82-05373 1511 5D

Bioassays and the Algal Populations of Hastings Lake, Alberta, Canada,
W82-05484 1511 2H

Preliminary Investigation of the Algal Flora in the Sediments of Lake Erie,
W82-05633 1511 5C

Algal Growth in Primary Settled Sewage–The Effects of Five Key Variables,
W82-06055 1512 5D

Multistep Approach to Identification of Limiting Nutrients in Northern Adriatic Eutrophied Coastal Waters,
W82-06267 1512 5C

Influence of Multicellular Configurations on Algal Growth in Aerated Lagoons,
W82-06662 1512 5D

Light Adaptation and Inhibition: Processes Important in Modelling the Growth of Algae in Drinking Water Basins,
W82-06827 1512 5C

Growth Dynamics of Cladophora Glomerata in Western Lake Erie in Relation to Some Environmental Factors,
W82-06932 1512 5C

Environmental Factors Controlling Physiological Changes in Cladophora in Lake Erie,
W82-06935 1512 5C

Projected Cladophora Growth in Southern Georgian Bay in Response to Proposed Municipal Sewage Treatment Plant Discharges to the Mary Ward Shoals,
W82-06936 1512 5C

Ecological Studies and Mathematical Modeling of Cladophora in Lake Huron: I. Program Description and Field Monitoring of Growth Dynamics,
W82-06939 1512 5C

Ecological Studies and Mathematical Modeling of Cladophora in Lake Huron: 2. Phosphorus Uptake Kinetics,
W82-06940 1512 5C

Biomass and Distribution of Cladophora Glomerata in Relation to Some Physical-Chemical Variables at two Sites in Lake Erie,
W82-06941 1512 5C

Monitoring Cladophora Growth Conditions and the Effect of Phosphorus Additions at a Shoreline Site in Northeastern Lake Erie,
W82-06942 1512 5C

The Use of Remote Sensing to Map the Areal Distribution of Cladophora Glomerata at a Site in Lake Huron,
W82-06973 1512 5B

Colonization and Growth of Attached Algae at the Lake Michigan Water Line,
W82-06976 1512 5C

Effects of Phosphorus Enrichment and Wave Simulation of Populations of Ulothrix Zonata from Northern Lake Superior,
W82-06979 1512 5C

ALGAL MATS
The Microfauna of Algal Mats and Artificial Substrates in Southern Victoria Land Lakes of Antarctica,
W82-05096 1511 2H

ALGICIDES
The Physico-Chemical and Planktonic Response of an Algicide-Treated Shallow Mountain Lake in Arizona,
W82-02571 1505 5G

Influence of Stabilizer Concentration on Effectiveness of Chlorine as an Algicide,
W82-06539 1512 5F

ALGORITHMS
Computerized Control of an Open-Channel Water Distribution System,
W82-02732 1506 4A

An Algorithm on Optimal Operations of Activated Sludge Systems,
W82-04009 1509 5D

Internal Rates of Return Derived from the Pay-Back Period,
W82-05542 1511 6B

A Multiobjective Branch-and-Bound Method for Planning Wastewater and Residual Management Systems,
W82-06149 1512 6A

ALKALINE SOILS
Infrared Spectroscopic Study of the Water-Soluble Fraction of Sewage Sludge-Soil Mixtures During Incubation,
W82-01130 1503 5E

Irrigation Practices for Reclaimed Alkali Soils,
W82-04269 1510 3F

ALKALINE WATER
Acute Toxicity of Zinc to Some Fishes in High Alkalinity Water,
W82-00713 1502 5C

ALKALINITY
Process for Removing Alkalinity and Hardness From Waters,
W82-00063 1501 5F

Fixed Endpoint Alkalinity Determination,
W82-01187 1503 7B

ALKYLPYRIDINES
Alkylpyridines in Surface Waters, Groundwaters, and Subsoils of a Drainage Located Adjacent to an Oil Shale Facility,
W82-00481 1501 5B

ALLEGHENY COUNTY
Comparative Analysis of Sludge and Refuse Leachate: A Preliminary Report,
W82-00287 1501 5E

ALLEGHENY RIVER BASIN
Water Resources Appraisals for Hydroelectric Licensing: Allegheny River Basin; Pennsylvania-New York.
W82-01751 1504 6D

ALLOCATION OF RESOURCES
Arkansas Water Policy.
W82-00715 1502 6D

ALLOTMENTS
Preferences for Allocating River Recreation Use,
W82-01181 1503 6D

Water Rights on Indian Allotments,
W82-02363 1505 6E

ALLUVIAL AQUIFER
Water-Level Map of the Mississippi Delta Alluvium in Northwestern Mississippi, April 1981,
W82-06138 1512 7C

ALLUVIAL AQUIFERS
Evaluation of the Water Resources Potential of the Lower Missouri River Valley Alluvium,
W82-06696 1512 6B

ALLUVIAL CHANNELS
River and Suspended Sediment Discharge into Byam Channel, Queen Elizabeth Islands, Northwest Territories, Canada,
W82-02637 1506 2E

Bend Theory of River Meanders. Part 1. Linear Development,
W82-05085 1511 2E

Mathematical Model for Erodible Channels,
W82-06336 1512 2J

Hydrologic and Morphologic Changes in Channels of the Platte River Basin: A Historical Perspective,
W82-06946 1512 2E

ALLUVIAL DEPOSITS
Retention of Urban Derived Phosphorus by an Alluvial Swamp of the Coastal Plain of Georgia,
W82-05286 1511 5B

ALLUVIAL FANS
Flood Hazard Identification and Flood Plain Management on Alluvial Fans,
W82-04738 1510 6F

ALLUVIAL RIVERS
The Application of Radioactive Tracers for Determination of Bed-Load Transport in Alluvial Rivers,
W82-01893 1504 2J

ALLUVIUM
Soluble Mineral Content in Surficial Alluvium and Associated Mancos Shale,
W82-05751 1511 3B

Evaluation of the Water Resources Potential of the Lower Missouri River Valley Alluvium,
W82-06696 1512 6B

ALPINE REGIONS
Physicochemical Influences on Phytoplankton Production in a Tropical Alpine Lake,
W82-02921 1506 2H

Hydrochemical Balance of an Alpine Watershed in Southeast Alaska,
W82-03402 1508 2K

Elevation: A Major Influence on the Hydrology of New Hampshire and Vermont, USA,
W82-04304 1510 2E

Microbial Dynamics of an Epilithic Mat Community in a High Alpine Stream,
W82-06729 1512 2E

ALPS
Reciprocating Hail Processes in the Alps,
W82-03227 1507 2B

ALTAMAHA RIVER BASIN
Water Resources Appraisal for Hydroelectric Licensing: Altamaha River Basin, Georgia,
W82-01764 1503 6D

ALTERATION OF FLOW
Local Flow Accelerations in Rivers,
W82-02758 1506 2E

ALTERNATIVE PLANNING
Formulating Alternatives for Environmental Studies,
W82-00997 1502 6G

Federal Water Resources Research: A Review of the Proposed Five-Year Program Plan.
W82-01051 1502 6E

Generating Alternative Solutions for Dynamic Programming Models of Water Resources Problems,
W82-01450 1503 6A

A Comprehensive Methodology for Project Appraisal and Environmental Protection in Multinational River Basin Development,
W82-01914 1504 6B

Interactive Nonstructural Flood-Control Planning,
W82-02320 1505 6F

Use of Mathematical Models to Generate Alternative Solutions to Water Resources Planning Problems,
W82-05072 1511 6A

ALTITUDE
Evaluation of a Precipitation Map Using a Smoothed Elevation-Precipitation Relationship and Optimal Estimates (Kriging),
W82-01892 1504 2B

Winter Water Relations of Red Spruce on Mount Monadnock, New Hampshire,
W82-02634 1506 2I

Regional Water Balance on the Arctic Tundra in Summer,
W82-06061 1512 2D

ALUM
History of a Water Chemical,
W82-00074 1501 5F

Acute and Chronic Effects of Alum to Midge Larva (Diptera: Chironomidae),
W82-00650 1502 5F

Demonstration Testing of Alum Recovery by Liquid Ion Exchange,
W82-01167 1503 5D

Aluminum Sulfate Treatment: Short-Term Effect on Complex Phosphorus Compounds in a Eutrophic Lake,
W82-01833 1504 5F

Optimizing Coagulants and Flocculant Aids for Settling,
W82-02409 1505 5F

Electrophoretic Mobility Measurements in Coagulation with Aluminum Salts,
W82-04790 1511 5F

Control of Alum Addition in Wastewater Treatment,
W82-04837 1511 5D

ALUMINUM
Interaction of Orthophosphate with Iron (III) and Aluminum Hydroxides,
W82-00783 1502 2H

Aluminum in Precipitation, Streams, and Shallow Groundwater in the New Jersey Pine Barrens,
W82-01297 1503 5B

Effect of Aluminum Speciation on Fish in Dilute Acidified Waters,
W82-01663 1503 5C

'Acid Rain', Dissolved Aluminum and Chemical Weathering at the Hubbard Brook Experimental Forest, New Hampshire,
W82-03641 1508 5B

Feasibility Studies on Liquid Ion Exchange for Alum Recovery from Water Treatment Plant Sludges,
W82-04107 1509 5E

Comparison of Atomic Absorption Spectrometric, Spectrophotometric, and Fluorimetric Methods for Determination of Aluminum in Water,
W82-04892 1511 5A

ALUMINUM COMPOUNDS
Electrophoretic Mobility Measurements in Coagulation with Aluminum Salts,
W82-04790 1511 5F

The Effect of Sulfate on Aluminum Concentrations in Natural Waters: Some Stability Relations in the System Al2O3-SO3-H2O at 298 K,
W82-05581 1511 2K

ALUMINUM OXIDE
Adsorption of Dissolved Organics in Lake Water by Aluminum Oxide. Effect of Molecular Weight,
W82-02940 1506 5F

ALUMINUM SULFATE
History of a Water Chemical,
W82-00074 1501 5F

Coagulation Mechanisms: An Electron Microscopic Study Using Aluminum Sulfate,
W82-04423 1510 5F

AMAZON LAKES
Classification of Central Amazon Lakes on the Basis of their Microbiological and Physico-Chemical Characteristics,
W82-00666 1502 2H

AMAZON RIVER
Size Distribution of Amazon River Bed Sediment,
W82-03488 1508 2J

Plankton Metabolism and Carbon Processes in the Amazon River, Its Tributaries, and Floodplain Waters, Peru-Brazil, May-June 1977,
W82-05197 1511 2K

AMERICAN RIVER
Water Resources Appraisals for Hydroelectric Licensing: American River Basin, California.
W82-01441 1503 6D

Placer Mining and Salmon Spawning in American River Basin, California,
W82-05200 1511 8I

AMERICIUM
Americium in Intertidal Sediments from the Coastal Environs of Windscale,
W82-02098 1504 5B

Laboratory and Field Studies of The Relative Mobility of 239, 24OPU and 241AM from Lake Sediments Under Oxic and Anoxic Conditions,
W82-03899 1509 5B

Influence of an Americium Solid Phase on Americium Concentrations in Solutions,
W82-04720 1510 5B

AMES TEST
On the Detection of Mutagenic/Carcinogenic Activities in Water with the Salmonella/Microsome Test (Ames Test)(Zum Nachweis Mutagener/Kanzerogener Aktivitaten in Wassern mit dem Salmonella/Mikrosomen-Test (Ames-Test)),
W82-06715 1512 5A

AMINO ACIDS
Chemical Composition of Labile Fractions in DOM,
W82-00917 1502 2H

Geochemistry of Amino Acids in Sediments from Clear Lake, California,
W82-02545 1505 2K

Protein and Free Amino Acids in Field-Grown Cowpea Seeds as Affected by Water Stress at Various Growth Stages,
W82-04184 1509 3F

AMINOCARB
Determination of Aminocarb in Water by High Performance Liquid Chromatography,
W82-00232 1501 5A

Identification and Determination of Aminocarb in Natural Water and Balsam Fir Foliage. (Recherche et Dosage De L'Aminocarb Dans Les eaux Naturelles et le Feuillage Du Sapin Baumier Par Chromatographie en Phase Gazeuse),
W82-03460 1508 5A

AMMONIA
An Alternative Solution to the THM Problem,
W82-00072 1501 5F

A Salicylate-Hypochlorite Method for Determining Ammonia in Seawater,
W82-00238 1501 5A

Role of Hydrodynamic Factors in Ammonia Desorption by Diffused Aeration,
W82-00293 1501 5D

Ammonia and Nitrate Uptake in the Lower Great Lakes,
W82-00882 1502 2H

Ammonia Electrode with Immobilized Nitrifying Bacteria,
W82-01099 1502 5A

Increased Toxicity of Ammonia to Rainbow Trout (Salmo Gairdneri) Resulting from Reduced Concentrations of Dissolved Oxygen,
W82-01629 1503 5C

Economic Impact of Existing Ammonia Nitrogen Water Quality Standard, IPCB Chapter 3, Rule 203 (F),
W82-02189 1505 5D

Nitrate and Ammonia Uptake in the Apex of the New York Bight,
W82-02286 1505 5C

Determination of Ammonia in Estuary,
W82-02390 1505 5A

Upgrading with Rotating Biological Contractors for Ammonia Nitrogen Removal,
W82-02673 1506 5D

Blue-Green Algal Ammonia Uptake in Hypertrophic Prairie Lakes,
W82-02914 1506 2H

Ammonia Volatilization in a Hypertrophic Prairie Lake,
W82-02915 1506 2H

Biological Kinetic Design for Nitrification in High-Strength Industrial Wastewaters,
W82-03597 1508 5D

Production of Ammonia in a Packed-Bed Anaerobic Upflow (ANFLOW) Bioreactor,
W82-03598 1508 5D

Characterization of a Contaminant Plume in Ground Water, Meredosia, Illinois,
W82-03645 1508 5B

Relative Effects on Stream Biota of Chlorine and Ammonia Occurring in Secondary Sewage,
W82-04409 1510 5C

Criteria for Nitrification in Fixed Film Reactors,
W82-05352 1511 5D

Effect of Turbulent Dispersion on the Rate of Ammonia Nitrogen in Rivers,
W82-05418 1511 5B

Investigations of Natural Hungarian Zeolite for Ammonia Removal,
W82-05482 1511 5D

Ammonia Nitrogen Removal in Facultative Wastewater Stabilization Ponds,
W82-06454 1512 5D

Multiple Potentiometric System for Continuous Determination of Chloride, Fluoride, Nitrate, and Ammonia in Natural Waters,
W82-06718 1512 5A

AMMONIUM

Modeling Ammonium Exchange and Regeneration on Clinoptilolite,
W82-00125 1501 5D

Transformations of Nitrogen in a Polluted Estuary: Nonlinearities in the Demand for Oxygen at Low Flow,
W82-00777 1502 5B

Effects of Temperature, pH, Salinity, and Inorganic Nitrogen on the Rate of Ammonium Oxidation by Nitrifiers Isolated from Wetland Environments,
W82-00910 1502 2L

The Effects of Organophosphorus Pesticides on Estuarine Ammonium Oxidizers,
W82-01567 1503 5C

Ion Exchange in Flow Injection Analysis Determination of Ammonium Ions at the Microgram per Liter Level in Natural Waters with Pulsed Nessler Reagent,
W82-03700 1508 5A

Ammonium Uptake by Micronesian Species of Gracilaria (Rhodophyta),
W82-05311 1511 5G

AMMONIUM COMPOUNDS

Economic Impact of Existing Ammonia Nitrogen Water Quality Standard, IPCB Chapter 3, Rule 203 (F),
W82-02189 1505 5D

AMPHIPODS

Relationship Between Populations of Amphipods and Pollution,
W82-02444 1505 5C

Production of Gammarus Lacustris (Amphipoda, Gammaridae) in Lake Sevan,
W82-02781 1506 2H

AMVRAKIA LAKE

Some Hydrobiological Characteristics in Amvrakia Lake, Western Greece,
W82-02753 1506 2H

ANABAENA

Bioassays and the Algal Populations of Hastings Lake, Alberta, Canada,
W82-05484 1511 2H

ANACOSTIA RIVER

Isolation, Enumeration, and Characterization of Aeromonas from Polluted Waters Encountered in Diving Operations,
W82-00224 1501 5C

ANADROMOUS FISH

Hydropower vs. Salmon: The Struggle of the Pacific Northwest's Anadromous Fish Resources for a Peaceful Coexistence with the Federal Columbia River Power System,
W82-01804 1504 6E

Influences of Freshwater Inflow on Chinook Salmon (Oncorhynchus Tshawytscha) in the Sacramento-San Joaquin Estuary,
W82-02142 1505 6G

Influence of Forest and Rangeland Management on Anadromous Fish Habitat in Western North America; 8. Effects of Mining,
W82-04071 1509 5C

Influence of Forest and Rangeland Management on Anadromous Fish Habitat in Western North America; 7. Effects of Livestock Grazing,
W82-04072 1509 5C

Forest Management and Anadromous Fish Habitat Productivity,
W82-06965 1512 5C

ANAEROBIC BACTERIA

Texans Claim Breakthrough in Anaerobic Waste Treatment,
W82-03565 1508 5D

ANAEROBIC CONDITIONS

Anaerobic Methane Oxidation: Occurrence and Ecology,
W82-00218 1501 2H

Chemistry of Septicity,
W82-00325 1501 5D

A Note on the Fate of El Tor Cholera and Other Vibrios in Percolating Filters,
W82-00566 1502 5D

Conversion of Abienol into Tetrahydroepimanool by Anaerobic Processes in Woodroom Debarking Effluent,
W82-00860 1502 5C

Kinetics of Trace Metal Partitioning in Model Anoxic Marine Sediments,
W82-02820 1506 5B

Dissolution of Tetragonal Ferrous Sulfide (Mackinawite) in Anoxic Aqueous Systems. 2. Implications for the Cycling of Iron, Sulfur, and Trace Metals,
W82-03771 1509 2K

Anaerobic Treatment in Novel Contact Digester,
W82-05681 1511 5D

Role of Surface Active Media in Anaerobic Filters,
W82-05816 1511 5D

Biological Equilibrium in a Wastewater Reservoir,
W82-06282 1512 5D

Anaerobic Processes,
W82-06923 1512 5D

ANAEROBIC DIGESTION

Apparatuses for the Anaerobic Digestion of Natural Organic Waste,
W82-00069 1501 5D

Anaerobic Treatment of Human Waste in Northern Communities,
W82-00249 1501 5E

Anaerobic Processes,
W82-01245 1503 5D

New Approaches to Anaerobic Sludge Digestion,
W82-01398 1503 5D

Anaerobic Carbon Filter for Degradation of Phenols,
W82-01454 1503 5D

Purification of Municipal Wastewater by Subsequent Reverse Osmosis and Anaerobic Digestion,
W82-01468 1503 5D

Production of Aromatic Acids During Anaerobic Digestion of Citrus Peel,
W82-02049 1504 5D

Evaluation of the Full-Scale Application of Anaerobic Sludge Digestion at the Blue Plains Wastewater Treatment Facility - Washington, D.C.,
W82-02965 1506 5D

Pilot-Scale Anaerobic Filter Treatment of Heat Treatment Liquor,
W82-02972 1506 5D

Demonstration of Anaerobic Biogas Digesters in Developing Countries. Part III: The Philippines,
W82-03226 1507 5D

Anaerobic Sludge Digestion--Need It Be Expensive,
W82-03389 1507 5D

Inland Container Saves Money with Anaerobic-Aerobic Treatment Plant,
W82-03593 1508 5D

Production of Ammonia in a Packed-Bed Anaerobic Upflow (ANFLOW) Bioreactor,
W82-03598 1508 5D

Anaerobic Activated Carbon Filter for the Treatment of Phenol-Bearing Waste Water,
W82-03680 1508 5D

Anaerobic Digestion of Farm Wastes: A Review - Part 2,
W82-04347 1510 5E

Terminal Reactions in the Anaerobic Digestion of Animal Waste,
W82-04454 1510 5D

Microbiology of Anaerobic Digestors for Wastewater Purification. (Microbiologie des Digesteurs Anaerobies de l'Epuration des eaux Residuaires),
W82-04544 1510 5D

The Importance of the Solids Content of the Sludge in Anaerobic Alkaline Digestion (Die Bedeutung des Feststoffgehalts bei der Schlammfaulung),
W82-04549 1510 5D

Package Anaerobic Sludge Digestion.
W82-04850 1511 5D

Anaerobic Treatment of High-Strength Wastes,
W82-04907 1511 5D

Influence of Temperature on the Anaerobic Acidification of Glucose in a Mixed Culture Forming Part of a Two-Stage Digestion Process,
W82-05240 1511 5D

Microbial Ecosystems Responsible for Anaerobic Digestion and Composting,
W82-05252 1511 5E

Use of Bench-Scale Digesters to Evaluate Full-Scale Digester Performance,
W82-05272 1511 5D

pH Influence on Acidogenic Dissimilation of Glucose in an Anaerobic Digestor,
W82-05341 1511 5D

Energy Conservation and Alternative Energy Sources in Wastewater Treatment,
W82-05440 1511 5D

Immobilized Microbes and a High-Rate, Continuous Waste Processor for the Production of High Btu Gas and the Reduction of Pollutants,
W82-06005 1512 5D

Modified Sludge Digestion with Improved Gas Yield (Modifizierte Schlammfaulung Mit Verbesserter Gasausbeute).
W82-06024 1512 5D

Product Inhibition in the Acid Forming Stage of the Anaerobic Digestion Process,
W82-06041 1512 5D

Comparison of the Extractabilities of Zn, Cu, Ni and Cr from Sewage Sludges Prepared by Treating Raw Sewage with the Metal Salts Before or After Anaerobic Digestion,
W82-06079 1512 5D

Treatment of Pulp and Paper Industry Wastewaters in an Anaerobic Fluidized Bed Reactor,
W82-06226 1512 5D

Anaerobic Filter Treatment of Molasses Distillery Slops,
W82-06312 1512 5D

Environmental Residuals and Capital Costs of Energy Recovery from Municipal Sludge and Feedlot Manure,
W82-06405 1512 5E

The Behaviour of Nitrilotriacetic Acid During the Anaerobic Digestion of Sewage Sludge,
W82-06667 1512 5D

The Effect of Increased Nickel Ion Concentrations on Microbial Populations in the Anaerobic Digestion of Sewage Sludge,
W82-06832 1512 5D

ANAEROBIC FILTER
Treatment of Phenol and Substituted Phenols with an Anaerobic Activated Carbon Filter,
W82-03959 1509 5D

ANAEROBIC LAGOONS
Treatment of Potato-Processing Waste Water by an Anaerobic Lagoon-Filter System,
W82-00226 1501 5D

Elimination of Odor from Anaerobic Lagoons,
W82-06221 1512 5D

ANAEROBIC TREATMENT
Treatment of Sulfite Evaporation Condensate with an Anaerobic Reactor,
W82-04419 1510 5D

ANALOG COMPUTERS
Possibility of Investigating Open-Channel Flows on an Analog Computer,
W82-02389 1505 6A

ANALYTICAL TECHNIQUES
Studies of the Transformations of Forms of Carbon, Nitrogen, Phosphorus, Sulfur and Some Principal Mineral Elements During the Measurement of the Total Oxygen Demand - II. Transformation of Forms of Nitrogen (In French),
W82-03485 1508 5A

Method of Selective Dissolution for Characterization of Particulate Forms of Radium and Barium in Natural and Waste Waters,
W82-03879 1509 5A

Evaluating Adsorbent Filter Performance for Enteric Virus Concentrations in Tap Water,
W82-03887 1509 5F

Continuous Measurements of Dissolved Oxygen in Water Culture by a Self-Calibrating Monitor,
W82-05015 1511 7B

ANCHORAGE
Institutional Analysis Criteria for Water Supply Planning,
W82-03930 1509 6D

Hydrogeology for Land-Use Planning: The Potter Creek Area, Anchorage, Alaska,
W82-04981 1511 5G

ANDROSCOGGIN RIVER
Origin and Chemical Composition of Androscoggin River Foam,
W82-02970 1506 5B

ANIMAL DISEASES
Persistence and Distribution of Erysipelothrix Rhusiopathiae and Bacterial Indicator Organisms on Land Used for Disposal of Piggery Effluent,
W82-00686 1502 5B

ANIMAL WASTES
Predicting Runoff Pollutant Reduction in Buffer Zones Adjacent to Land Treatment Sites,
W82-00141 1501 5B

Persistence and Distribution of Erysipelothrix Rhusiopathiae and Bacterial Indicator Organisms on Land Used for Disposal of Piggery Effluent,
W82-00686 1502 5B

Chemical and Bacteriological Quality of Pasture Runoff,
W82-01555 1503 5B

A Selective Medium for the Enumeration of Streptococcus Bovis by Membrane Filtration,
W82-01620 1503 5A

Pollution from Farms,
W82-02039 1504 5D

Economic and Technical Evaluations of Swine Manure Management Systems Which Use Land Applications,
W82-02175 1505 5E

Mass Production of Freshwater Rotifers on Liquid Wastes I. The Influence of Some Environmental Factors on Population Growth of Brachionus Rubens Ehrenberg 1838,
W82-03114 1507 5D

Occurrence of Rhodococcus Coprophilus and Associated Actinomycetes in Feces, Sewage, and Freshwater,
W82-03122 1507 5A

Some Methods Available for Treatment of Waste Water in the Dairy Industry,
W82-03650 1508 5D

Mass Production of Freshwater Rotifiers on Liquid Wastes II. Mass Production of Brachionus Rubens Ehrenberg 1838 in the Effluent of High-Rate Algal Ponds Used for the Treatment of Piggery Waste,
W82-03884 1509 3C

Polyculture of the Freshwater Prawn, Macrobrachium Rosenbergii, Chinese and Common Carps in Ponds Enriched with Swine Manure I. Initial Trials,
W82-03900 1509 3C

Terminal Reactions in the Anaerobic Digestion of Animal Waste,
W82-04454 1510 5D

Water Quality in a Stream Receiving Dairy Feedlot Effluent,
W82-04860 1511 5B

An Evaluation System to Rate Feedlot Pollution Potential,
W82-05207 1511 5B

Agricultural Runoff and Water Pollution,
W82-05569 1511 5B

Efffect of Cattle Manure on Soil Erosion by Water,
W82-06834 1512 4D

ANION EXCHANGE
Regeneration of Anion Exchange Resins by Calcium Carbonate and Carbon Dioxide,
W82-01484 1503 5F

The Removal of Organic Matter from Surface Water Supplies by Anion Exchange Resins,
W82-01697 1503 5F

Oriented Monolayer Assemblies to Modify Fouling Propensities of Membranes.
W82-06167 1512 3A

ANISOTROPY
Parameterization of Contaminant Transport Through an Anisotropic Unconfined Aquifer,
W82-01570 1503 5B

ANN ARBOR
Cold Weather Waste Treatment,
W82-00636 1502 5D

ANNE ARUNDEL COUNTY
Coordinated Effort Stems Sediment and Erosion,
W82-00766 1502 4D

ANNUAL DISTRIBUTION
Calculation of the Annual Distribution of River Runoff When Observation Data Are Available,
W82-02854 1506 2E

ANNUAL FLOODS
Spring Flood: Meltwater or Groundwater,
W82-00531 1502 7B

ANODIC STRIPPING VOLTAMMETRY
Anodic Stripping Voltammetry as an Analytical Tool,
W82-04811 1511 5A

ANTARCTIC
Evaluation of Ultraviolet Spectrophotometric Determination of Nitrate-Nitrogen in Glacial Snow, Firn and Ice,
W82-01572 1503 5A

A Model of the Antarctic Sink for Stratospheric Water Vapor,
W82-01686 1503 2A

Sources of Twelve Trace Metals in Antarctic Snows Determined by Principal Component Analysis,
W82-02378 1505 5B

The Production Ecology of Benthic Plants in Some Antarctic Lakes. I. In Situ Production Studies,
W82-02860 1506 2H

The Production Ecology of Benthic Plants in Some Antarctic Lakes. II. Laboratory Physiology Studies,
W82-02861 1506 2H

Production Strategies in Antarctic Inland Waters: Phytoplankton Eco-Physiology in a Permanently Ice-Covered Lake,
W82-02862 1506 2C

On Antarctic Glaciology: Ice Sheets--And Ice Cores,
W82-03170 1507 2C

West Antarctic Ice Sheet Fluctuations in the Antarctic Peninsula Area,
W82-03362 1507 2C

Biogenic Calcite Structures Forming in Lake Fryxell, Antarctica,
W82-04638 1510 2H

ANTARCTIC OCEAN
On the Estimation of Antarctic Iceberg Melt Rate,
W82-00166 1501 2C

ANTARCTICA
A Mechanism for the formation of Large Icebergs,
W82-04798 1511 2C

The Microfauna of Algal Mats and Artificial Substrates in Southern Victoria Land Lakes of Antarctica, 1511 2H
W82-05096

ANTECEDENT MOISTURE
Antecedent Moisture Condition Probabilities, 1512 2A
W82-06451

ANTECEDENT PRECIPITATION INDEX
Water Loss Equations and Coefficients to Estimate Runoff from Rainfall, 1508 2A
W82-03441

ANTIBIOTICS
Agglutination and Bactericidal Responses of the Channel Catfish to Salmonella Paratyphi, 1505 5C
W82-02524

ANTIBODIES
Enzymes and Antibodies as Sensors of Toxic Substances, 1511 5A
W82-05160

ANTIMIGRANTS
Use of Hydroxylpropylcellulose to Decrease Wastage of Disperse Dyes in the Continuous Dyeing of Polyester, 1509 5G
W82-04164

ANTIMONY
The Spectrophotometric Determination of Antimony in Water, Effluents, Marine Plants and Silicates, 1505 5A
W82-02355

Determination of Arsenic and Antimony in Water and Soil by Hydride Generation and Atomic Absorption Spectroscopy, 1511 5A
W82-05141

Sample Digestion Procedures for Simultaneous Determination of Arsenic, Antimony, and Selenium by Inductively Coupled Argon Plasma Emission Spectrometry with Hydride Generation, 1511 5A
W82-05360

ANTWERP
A Century of Water for Antwerp, 1507 5F
W82-03355

Groundwater Contaminants from Land Disposal of Residues: A Survey in The Province of Antwerp, Belgium, 1509 5B
W82-03911

APPALACHIAN REGION
Effects of a Dam and Sewage Outflow on a Small Oligotrophic Stream in the Southern Appalachians, 1512 5C
W82-06966

APPLES
Influence of Trickle and Sprinkle Irrigation on Golden Delicious Apple Quality, 1504 3F
W82-02001

APPLICATION EQUIPMENT
Traveling Sprinkler System and Method, 1502 3F
W82-00561

Sprinkler Leveler and Wind Compensating Device, 1512 3F
W82-06164

APPLICATION RATES
Land Disposal of Sewage Sludge, A Summary of Research Results, 1972-1980, 1512 5E
W82-06377

APPROPRIATION
Recent Developments in Colorado Groundwater Law, 1510 6E
W82-04679

Bubb v. Christensen: The Rights of the Private Landowner Yield to the Rights of the Water Appropriator Under the Colorado Doctrine, 1510 6E
W82-04680

APPROXIMATION METHOD
Hydrologic Maps of Ogallala Aquifer, West-Central Kansas, 1505 7C
W82-02475

AQUACULTURE
Evaluation of the Effectiveness of Granular Activated Carbon Adsorption and Aquaculture for Removing Toxic Compounds From Treated Petroleum Refinery Effluents, 1501 5D
W82-00098

Growth of the Bay Scallop, Argopecten Irradians, in a Waste Recycling Aquaculture System, 1502 3C
W82-00842

Kinetics of Nitrate and Ammonium Uptake by the Tropical Freshwater Macrophyte Pistia Stratiotes L., 1502 5D
W82-00937

Application of Nutrient-Saturated Growth Model to Phytoplankton Management in Freshwater Prawn (Macrobrachium Rosenbergii) Ponds in Hawaii, 1503 2H
W82-01483

Effect of Fertilizers on the Primary and Bacterial Production of Rearing Ponds in the Volga Delta, 1504 2H
W82-02077

Estimation of Primary Productivity from Diel Nitrate Uptake Measurements of the Water Hyacinth Eichhornia Crassipes in an Aquaculture System, 1506 5D
W82-02635

PP and L Uses Discharge Water for Fish Farming, 1506 3C
W82-02645

Effects of Hydrological and Biological Variables on the Survival, Growth, and Food Utilization of Estuarine Fishes Cage-Cultured in a Heated Water System, 1506 5C
W82-02730

Mineral Nutrient Availability in Watercress Bed Substrates, 1506 2I
W82-02769

Urban Aquaculture of the Rainbow Trout (Salmo gairdneri), 1506 8I
W82-02812

Mass Production of Freshwater Rotifers on Liquid Wastes I. The Influence of Some Environmental Factors on Population Growth of Brachionus Rubens Ehrenberg 1838, 1507 5D
W82-03114

Engineers Assess Aquaculture Systems for Wastewater Treatment, 1507 5D
W82-03354

Mass Production of Freshwater Rotifers on Liquid Wastes II. Mass Production of Brachionus Rubens Ehrenberg 1838 in the Effluent of High-Rate Algal Ponds Used for the Treatment of Piggery Waste, 1509 3C
W82-03884

Polyculture of the Freshwater Prawn, Macrobrachium Rosenbergii, Chinese and Common Carps in Ponds Enriched with Swine Manure I. Initial Trials, 1509 3C
W82-03900

Aquacultural Approaches to Recycling of Dissolved Nutrients in Secondarily Treated Domestic Wastewaters--II. Biological Productivity of Artificial Food Chains, 1509 5D
W82-04197

Aquacultural Approaches to Recycling of Dissolved Nutrients in Secondarily Treated Domestic Wastewater--IV. Conclusions, Design and Operational Considerations for Artificial Food Chains, 1510 5D
W82-04369

Aquacultural Approaches to Recycling of Dissolved Nutrients in Secondarily Treated Domestic Wastewaters--III. Uptake of Dissolved Heavy Metals by Artificial Food Chains, 1510 5D
W82-04370

Aquacultural Approaches to Recycling of Dissolved Nutrients in Secondarily Treated Domestic Wastewaters--I. Nutrient Uptake and Release by Artificial Food Chains, 1510 5D
W82-04371

Aquaculture for Waste Management, 1512 5D
W82-06556

AQUATIC ANIMALS
Toxicities of Paraquat and Diquat Herbicides to Freshwater Copepods (Diaptomus Sp. and Eucyclops Sp.), 1502 5C
W82-00589

Dynamics of Selenium in Mercury-Contaminated Experimental Freshwater Ecosystems, 1502 5B
W82-00595

Growth of the Bay Scallop, Argopecten Irradians, in a Waste Recycling Aquaculture System, 1502 3C
W82-00842

Toxicity and Bioaccumulation of Endrin and Methoxychlor in Aquatic Invertebrates and Fish, 1503 5C
W82-01160

A New Method for Assessing the Lethal Impact of Short-Term, High-Level Discharges of Pollutants on Aquatic Animals, 1504 5C
W82-01993

An Evaluation of Aquatic Life Found at Hydraulic Scour Sites in the Columbia River Estuary Selected for Potential Sediment Deposition, 1505 2L
W82-02132

Some Effects of Fresh Water on the Atchafalaya Bay System, 1505 6G
W82-02143

Effects of Water Drawdown on the Fauna in Small Cold Water Reservoirs, 1509 6G
W82-04219

A Faunal Analysis of the Springs off the Ouachita Mountains, Arkansas, 1512 2K
W82-06161

AQUATIC BACTERIA
Comparison of Two Direct-Count Methods for Determining Metabolizing Bacteria in Freshwater, 1501 5A
W82-00495

Algal-Bacterial Symbiosis in the Chowan River, NC, 1505 5A
W82-02177

Biodegradation of Synthetic Crude Oil in Two Rivers of Northern Alberta, Canada, 1511 5B
W82-05486

AQUATIC DRIFT
Methods of Studying Invertebrate Drift in Rivers, 1504 7A
W82-02074

AQUATIC ENVIRONMENT

An Analysis of Factors Affecting Oxygen Depletion in the New York Bight,
W82-00106 1501 5C

Distribution of Clostridium Botulinum,
W82-00349 1501 5A

Occurrence of Tetraalkylead Compounds in the Aquatic Environment,
W82-00878 1502 5A

A Review on Sediment Traps in Aquatic Environments,
W82-01020 1502 7B

Kinetics for the Aquatic Environment,
W82-01631 1503 2K

Microbiology of the Aquatic Environment,
W82-01786 1503 5C

Kinetics for the Aquatic Environment,
W82-01806 1504 2K

On the Presence of Fecal Steroids in Sediments from Two Mexican Harbors,
W82-02012 1504 5A

Recent Trends in Environmental Impact Assessment,
W82-02525 1505 6G

Microcosms as Test Systems for the Ecological Effects of Toxic Substances: An Appraisal with Cadmium,
W82-03026 1507 5C

Canada Water Year Book 1979-1980, Water Research Division.
W82-03096 1507 7C

Survey of Polychlorinated Biphenyls in Industrial Effluents in Canada.
W82-03107 1507 5A

Degradation of Pentachlorophenol in Simulated Lentic Environment,
W82-03489 1508 5B

Influence of Forest and Rangeland Management on Anadromous Fish Habitat in Western North America; 8. Effects of Mining,
W82-04071 1509 5C

Influence of Forest and Rangeland Management on Anadromous Fish Habitat in Western North America; 7. Effects of Livestock Grazing,
W82-04072 1509 5C

Biota and Biological Principles of the Aquatic Environment.
W82-04499 1510 5C

Pesticides in the Aquatic Environment,
W82-04727 1510 5C

Biological Monitoring of Hazardous Wastes in Aquatic Systems,
W82-05154 1511 5A

Relationship Between the Distribution of Phosphorus Compounds in the Tissues of the Bivalve Anodonta Cygnea and Environmental Phosphorus Level,
W82-05506 1511 5C

AQUATIC ENVIRONMENTS

Model Experiments on the Growth of Enteric Bacteria in Fresh and Sea Water,
W82-02377 1505 5A

AQUATIC FAUNA

The Microfauna of Algal Mats and Artificial Substrates in Southern Victoria Land Lakes of Antarctica,
W82-05096 1511 2H

AQUATIC FOOD CHAINS

Herbicides in Kansas Waters--Evaluations of the Effects of Agricultural Runoff and Aquatic Weed Control on Aquatic Food Chains,
W82-06304 1512 5C

AQUATIC FUNGI

Occurrence of Aphanomyces Ovidestruens, a Fungus Parasitic on Copepods, in Two Eutrophic Lakes,
W82-00304 1501 2H

Aquatic Microbiology with Reference to Tannin Degradation,
W82-02028 1504 5B

On Some Chytrids Found in Estuarine Habitats,
W82-02038 1504 2L

Seasonal and Diurnal Fluctuations of Oomycete Propagule Numbers in the Free Water of a Freshwater Lake,
W82-02274 1505 2H

Estuarine Distribution of Saprolegniaceae in the Tampa Bay Area: I,

Estimation of Calcium Sulfate Solution Rate and Effective Aquifer Surface Area in a Ground-Water System near Carlsbad, New Mexico,
W82-02612 1506 2F

Analysis of Pumping Test Data Using Marquardt Algorithm,
W82-02721 1506 2F

Radiocarbon Dating of Groundwater of the Aquifer Confined in the Lower Triassic Sandstones of the Lorraine Region, France,
W82-02877 1506 2F

Determination of Aquifer Parameters from Large-Diameter Dug Well Pumping Tests,
W82-02917 1506 2F

A Geochemical Method of Determining Dispersivity in Regional Groundwater Systems,
W82-02941 1506 2F

Preparation of Friable Aquiferous Specimens,
W82-02955 1506 2F

BIEM Solutions to Combinations of Leaky, Layered, Confined, Unconfined, Nonisotropic Aquifers,
W82-03079 1507 2F

Modeling Double Aquifer Flow Using a Comprehensive Potential and Distributed Singularities 2. Solution for Inhomogeneous Permeabilities,
W82-03084 1507 2F

Estimating Aquifer Parameters for Large-Diameter Wells,
W82-03647 1508 2F

The Rate of Flushing as a Major Factor in Determining the Chemistry of Water in Fossil Aquifers in Southern Israel,
W82-03799 1509 2K

A Study of Intergranular and Fissure Permeability in Chalk and Permian Aquifers, Using Double-Packer Injection Testing,
W82-03804 1509 2F

Ground Water Chemistry and Hydrochemical Facies Distribution as Related to Flow in the Mississippian Carbonates, Harrison County, Indiana,
W82-03810 1509 2F

Two-Phase Flow Simulation of Air Storage in an Aquifer,
W82-03841 1509 2F

The Value of Exploratory Test Holes in Ground Water Development,
W82-03896 1509 2F

Geohydrologic Appraisal of Water Resources of the South Fork, Long Island, New York,
W82-04206 1509 7C

Correlation of Selected Well Water Quality Parameters with Soil and Aquifer Hydrologic Properties,
W82-04242 1509 5B

Ground-Water Conditions in the Upper Virgin River and Kanab Creek Basins Area, Utah, with Emphasis on the Navajo Sandstone,
W82-04486 1510 6D

Maps Showing Ground-Water Conditions in the Bill Williams Area, Mohave, Yavapai, and Yuma Counties, Arizona--1980,
W82-04488 1510 7C

Thickness, Percent Sand, and Configuration of Shallow Hydrogeologic Units in the Powder River Basin, Montana and Wyoming,
W82-04501 1510 7C

Preliminary Data from Arbuckle Test Wells, Miami, Douglas, Saline, and Labette Counties, Kansas,
W82-04512 1510 7C

Groundwater Resources of the Williamsport Region, Lycoming County, Pennsylvania,
W82-04971 1511 2F

Groundwater and Geology of the Cumberland Valley, Cumberland County, Pennsylvania,
W82-04972 1511 2F

Groundwater Resources of the Gettysburg and Hammer Creek Formations, Southeastern Pennsylvania,
W82-04973 1511 2F

Assessment of a Regional Aquifer in Central Illinois,
W82-05052 1511 2F

Bedrock Aquifers in the Lower Dirty Devil River Basin Area, Utah, with Special Emphasis on the Navajo Sandstone,
W82-05220 1511 7C

Results of Deep-Well Injection Testing at Mulberry, Florida,
W82-05224 1511 5B

Numerical Simulation of a Thick Freshwater Lens: Pearl Harbor Groundwater Model,
W82-05621 1511 2F

Determination of Aquifer Parameters Using Regression Analysis,
W82-05734 1511 2F

The Hydrogeological Basis for a Water Supply to Kabwe, Zambia,
W82-05804 1511 4B

Hydrogeologic Reconnaissance of the Republican River Basin in Nebraska,
W82-05828 1511 7C

Ground-Water Reconnaissance of Part of the Lower Kenai Peninsula, Alaska,
W82-05837 1511 2F

Lineaments and Fracture Traces, Jennings County and Jefferson Proving Ground, Indiana,
W82-06675 1512 2F

Hydrology and Model of North Fork Solomon River Valley, Kirwin Dam to Waconda Lake, North-Central Kansas,
W82-06684 1512 2A

AQUIFER CHARCTERISTICS

Ground-Water Appraisal of Sand Plains in Benton, Sherburne, Stearns, and Wright Counties, Central Minnesota.
W82-02838 1506 2F

AQUIFER MANAGEMENT

Plan of Study for the Regional Aquifer-System Analysis of the Snake River Plain, Idaho and Eastern Oregon,
W82-00730 1502 6A

Interstate Conflict Over Ground Water: Wisconsin-Illinois,
W82-00818 1502 6E

Ground Water in the Ohio River Basin Portion of Maryland: Problems and Needs,
W82-01054 1502 4B

A One-Dimensional, Finite Element Salt Water Intrusion Model,
W82-01452 1503 7A

Thermal Energy Storage in a Confined Aquifer: Second Cycle,
W82-01473 1503 4B

Assessment of Eighteen Public Groundwater Supplies in Illinois,
W82-02510 1505 2F

Management of Interstate Aquifer Systems,
W82-02578 1505 4B

Aquifer Thermal Energy Storage: A Numerical Simulation of Auburn University Field Experiments,
W82-02919 1506 4B

Remote Sensing from Space-II.
W82-03248 1507 7B

Aquifer Management in Dade County,
W82-05784 1511 5G

Sensible Energy Storage in Aquifers. 1. Theoretical Study,
W82-06059 1512 4B

An Optimization Algorithm in a System for Management of the Regional Safe Groundwater Yield,
W82-06616 1512 4B

Artificial Recharge of Colorado River Water in Las Vegas Valley: Management Options and Potential Aquifer System Responses,
W82-06694 1512 6B

AQUIFER PROPERTIES

Geoelectric Soundings for Predicting Aquifer Properties,
W82-02619 1506 2F

Identification of Aquifer Transmissivities: The Comparison Model Method,
W82-06859 1512 2F

AQUIFER SYSTEMS

A 10-Year Plan to Study the Aquifer System of Indian Wells Valley, California,
W82-00086 1501 6D

Extension of the Integrodifferential Approach to Inhomogeneous Multiaquifer Systems,
W82-02017 1504 2F

Atoll Island Hydrology,
W82-02617 1506 2F

Modeling Double Aquifer Flow Using a Comprehensive Potential and Distributed Singularities 1. Solution for Homogeneous Permeability,
W82-03078 1507 2F

Design and Economics of a Solar Heater Aquifer Storage System,
W82-03143 1507 4B

Use of Longitudinal Conductance in Estimating Transmissivity of Granular Aquifers in Northern Missouri,
W82-03957 1509 2F

Two-Dimensional Ground-Water Flow Model of the Cretaceous Aquifer System of Lee County and Vicinity, Mississippi,
W82-04492 1510 2F

A Numerical Model of Aquifer Tests in Multi-Layered Aquifer/Aquitard Systems,
W82-05943 1512 2F

Hydrogeologic Data from Selected Wells and Test Holes in Suffolk County, Long Island, New York, 1972-80,
W82-06131 1512 7C

AQUIFER TESTING

Determination of Hydrogeological Parameters Using Sinusoidal Pressure Tests: A Theoretical Appraisal,
W82-00603 1502 7B

Simulation of an Aquifer Test on the Tesuque Pueblo Grant, New Mexico,
W82-02465 1505 2F

A Method of Performing Response Tests on Highly Permeable Aquifers,
W82-02916 1506 2F

Determination of Aquifer Parameters from Large-Diameter Dug Well Pumping Tests,
W82-02917 1506 2F

A Numerical Model of Aquifer Tests in Multi-Layered Aquifer/Aquitard Systems,
W82-05943 1512 2F

AQUIFERS

Ground-Water Data for Michigan, 1979,
W82-00014 1501 2F

Potentiometric Surface of the Floridan Aquifer in the Suwannee River Water Management District, Florida, May 1980,
W82-00024 1501 7C

Potentiometric Surface of the Floridan Aquifer in the Northwest Florida Water Management District, May 1980,
W82-00025 1501 7C

Preliminary Data From a Series of Artificial Recharge Experiments at Stanton, Texas,
W82-00085 1501 7C

Isolation of Methanobacterium Bryantii from a Deep Aquifer by Using a Novel Broth-Antibiotic Disk Method,
W82-00240 1501 5A

Digital Model of the Unconsolidated Aquifer System in the Modesto Area, Stanislaus and San Joaquin Counties, California,
W82-00415 1501 4B

Potentiometric-Surface Map for the Cretaceous Aquifer, Virginia Coastal Plain, 1978,
W82-00727 1502 7C

Well-Field Drawdowns Using Coupled Aquifer Model,
W82-00990 1502 2F

Mass Transport of Solutes in Dual-Porosity Media,
W82-01104 1503 5B

A Comparison of the Incomplete Cholesky-Conjugate Gradient Method with the Strongly Implicit Method as Applied to the Solution of Two-Dimensional Groundwater Flow Equations,
W82-01315 1503 2F

A Mathematical Model of Water Table Fluctuation in a Semi-Infinite Aquifer Induced by Localized Transient Recharge,
W82-01319 1503 2F

Uranium Isotopes as a Natural Tracer in the Waters of the Bet Shean-Harod Valleys, Israel,
W82-01328 1503 2F

Geohydrologic Models of the Houston District, Texas,
W82-01335 1503 2F

Hydrochemical Facies in a Tertiary Basin in the Milligan Canyon Area, Southwest Montana,
W82-01481 1503 2F

Parameterization of Contaminant Transport Through an Anisotropic Unconfined Aquifer,
W82-01570 1503 5B

Numerical Analysis of Transient Salt/Fresh-Water Interface in Coastal Aquifers,
W82-01693 1503 2F

Selected Drill-Stem-Test Data from the Northern Great Plains Area of Montana,
W82-01774 1503 7C

An Aquifer Simulation Program for Micro-Based Processors,
W82-01879 1504 2F

Mathematical Model for Regional Land Subsidence Due to Pumping 1. Integrated Aquifer Subsidence Equations Based on Vertical Displacement Only,
W82-01926 1504 2F

Mathematical Model for Regional Land Subsidence Due to Pumping 2 Integrated Aquifer Subsidence Equations for Vertical and Horizontal Displacements,
W82-01927 1504 2F

The Statistical Mechanical Theory of Groundwater Flow,

San Francisco River Wild and Scenic River Study Report; Greenlee County, Arizona,
W82-04076 1509 6G

The Economic Effects of Changes in Water Use in the Tucson Basin, Arizona,
W82-04156 1509 6E

Reconstructed Stream Flow for the Salt and Verde Rivers from Tree-Ring Data,
W82-04340 1510 2E

The Use of Landsat Imagery in Ground Water Exploration,
W82-04436 1510 7B

Maps Showing Ground-Water Conditions in the Bill Williams Area, Mohave, Yavapai, and Yuma Counties, Arizona--1980,
W82-04488 1510 7C

The Disastrous Southern California and Central Arizona Floods, Flash Floods, and Mudslides of February 1980,
W82-04632 1510 2E

Nitrogen and Phosphorus Dynamics in Hot Desert Streams of Southwestern U.S.A.,
W82-04930 1511 2K

Arizona Ground-Water Reform: Innovations in State Water Policy,
W82-04933 1511 6E

Reconnaissance Samplings and Characterization of Aquatic Humic Substances at the Yuma Desalting Test Facility, Arizona,
W82-04983 1511 3A

Maps Showing Ground-Water Conditions in the San Simon Wash Area, Papago Indian Reservation, Arizona--1979,
W82-05231 1511 7C

Maps Showing Ground-Water Conditions in the Agua Fria Area, Yavapai and Maricopa Counties, Arizona-1979,
W82-05232 1511 7C

Rapid-Infiltration Research at Flushing Meadows Project, Arizona,
W82-05334 1511 5D

Annual Summary of Ground-Water Conditions in Arizona, Spring 1979 to Spring 1980.
W82-05826 1511 4B

Map Showing Ground-Water Conditions in the Sacramento Valley Area, Mohave County, Arizona--1979,
W82-05827 1511 7C

Consumptive Use of Water by Major Crops in the Southwestern United States,
W82-06964 1512 3F

ARKANSAS

Report of the Annual Yield of the Arkansas River Basin for the Arkansas River Basin Compact, Arkansas--Oklahoma, 1980 Water Year,
W82-00012 1501 6E

Water - Its Use and the Implications for Arkansas Agriculture.
W82-00714 1502 6D

Arkansas Water Policy.
W82-00715 1502 6D

Adjusting Government Role in Water Law.
W82-02236 1505 6E

Water-Quality Reconnaissance of the Larkin Creek Watershed, Lee and St. Francis Counties, Arkansas,
W82-02489 1505 5A

Potentiometric Surface Maps of the Sparta Sand: Northern Louisiana and Southern Arkansas, 1900, 1965, 1975, and 1980,
W82-02839 1506 2F

Water-Quality Reconnaissance of Harding Creek, Lawrence County, Arkansas,
W82-03995 1509 7C

Ground-Water Levels in Arkansas, Spring 1981,
W82-04489 1510 7C

Water Resources Data for Arkansas, Water Year 1980.
W82-04503 1510 7C

Discharge Data at Water-Quality Monitoring Stations in Arkansas, 1980 Water Year,
W82-05841 1511 7C

Estimating Water Demand Schedules for Selected Industries in Arkansas,
W82-06160 1512 6D

A Faunal Analysis of the Springs off the Ouachita Mountains, Arkansas,
W82-06161 1512 2K

Radionuclides in Dardanelle Lake in the Area of the Nuclear I Facility: 1979-1981,
W82-06169 1512 5B

A Benefit Cost Analysis of a Soil Erosion Control Program for the Northern Watershed of Lake Chicot, Arkansas,
W82-06170 1512 4D

Water-Resources Investigations of the U. S. Geological Survey in Arkansas--Fiscal year 1981.
W82-06673 1512 7C

Controlling Agricultural Soil Loss in Arkansas' North Lake Chicot Watershed: A Cost Analysis,
W82-06796 1512 4D

Reservoir Water Quality Sampling Design,
W82-06868 1512 2H

ARKANSAS RIVER BASIN

Report of the Annual Yield of the Arkansas River Basin for the Arkansas River Basin Compact, Arkansas--Oklahoma, 1980 Water Year,
W82-00012 1501 6E

Selected Hydrologic Data, Arkansas River Basin, Pueblo and Southeastern Fremont Counties, Colorado, 1975-80,
W82-00020 1501 7C

Water Resources Data for Kansas, Water Year 1980--Volume 2. Arkansas River Basin.
W82-00079 1501 7C

Water Resources Appraisals for Hydroelectric Licensing: Upper Arkansas River Basin; Colorado, Kansas, and New Mexico.
W82-01761 1503 6D

Rainfall-Runoff Modeling and Preliminary Regional Flood Characteristics of Small Rural Watersheds in the Arkansas River Basin in Colorado,
W82-02462 1505 2A

Economics of Controlling Natural Salt Sources in the Arkansas River Basin,
W82-04234 1509 6B

ARMAND BAYOU

Intensive Survey of Armand Bayou,
W82-04079 1509 5A

AROMATIC AMINES

Selective Concentration and Isolation of Aromatic Amines from Water,
W82-03829 1509 5D

AROMATIC COMPOUNDS

Reverse Phase Concentration of Trace Polycyclic Aromatic Hydrocarbons in Water,
W82-01689 1503 5A

Distribution of Polycyclic Aromatic Hydrocarbons in Sediments from Estuaries of Southeastern Australia,
W82-02438 1505 5B

Management of Ground Water Contaminated by Aromatic Hydrocarbons in the Aquifer Supplying Ames, Iowa,
W82-02611 1506 5B

Biogenic and Abiogenic Polynuclear Aromatic Hydrocarbons in Sediments from Two Remote Adirondack Lakes,
W82-04293 1510 5B

Analysis of Marine Sediment, Water and Biota for Selected Organic Pollutants,
W82-04823 1511 5A

Microbial Degradation of 14C-Diphenylamine in a Laboratory Model Sewage Sludge System,
W82-04832 1511 5D

Polycyclic Aromatic Hydrocarbons in Sediments and Associated Benthos in Lake Erie,
W82-04882 1511 5A

Biosorption of Hydrophobic Organic Pollutants by Mixed Microbial Populations,
W82-04885 1511 5B

Direct Analytical Method for Aromatic Compounds in Water by Steam Carrier Gas Chromatography,
W82-05164 1511 5A

Simple Procedures for Enrichment of Chlorinated Aromatic Pollutants from Fat, Water and Milk for Subsequent Analysis by High-Resolution Methods,
W82-06015 1512 5A

Comparative Study on Organic Constituents in Polluted and Unpolluted Inland Aquatic Environments--III. Phenols and Aromatic Acids in Polluted and Unpolluted Waters,
W82-06033 1512 5A

Separation of Aqueous Organic Mixtures by Pervaporation and Analysis by Mass Spectrometry or a Coupled Gas Chromatograph-Mass Spectrometer,
W82-06791 1512 5A

AROMATIC HYDROCARBONS

Photolysis of Polycyclic Aromatic Hydrocarbons in Water,
W82-04835 1511 5B

ARSENATES

Adsorption of Arsenite and Arsenate on Amorphous Iron Hydroxide,
W82-06311 1512 5D

ARSENIC

Redox Stability of Inorganic Arsenic(III) and Arsenic(V) in Aqueous Solution,
W82-00206 1501 5A

Experimental Studies on the Effect of Arsenic on Microbial Degradation of Organic Matter and Algal Growth,
W82-00237 1501 2H

Characterization of an Enzymatic Determination of Arsenic(V) Based on Response Surface Methodology,
W82-01656 1503 5A

Interlaboratory Quality Control Study No. 26, Arsenic and Selenium in Water,
W82-01854 1504 5A

Application of Hydride Generation to the Determination of Trace Concentrations of Arsenic by Inductively-Coupled Plasma Atomic Emission Spectrometry,
W82-02718 1506 5A

Differential Pulse Polarographic Determination of Inorganic and Organic Arsenic in Natural Waters,
W82-02903 1506 5A

Inorganic Contaminant Removal from Drinking Water by Reverse Osmosis,
W82-02969 1506 5F

Characterization of Boliden's Sulfide-Lime Precipitation System,
W82-02988 1506 5D

Arseno-Sugars from Brown Kelp (Ecklonia Radiata) as Intermediates in Cycling of Arsenic in a Marine Ecosystem,
W82-03183 1507 5B

Arsenic in Lake Lansing, Michigan,
W82-03522 1508 5B

Hemosiderin Granules: Cytotoxic Response to Arsenic Exposure in Channel Catfish,
W82-03607 1508 5C

Determination of Arsenic and Antimony in Water and Soil by Hydride Generation and Atomic Absorption Spectroscopy,
W82-05141 1511 5A

Fingerprinting Inorganic Arsenic and Organoarsenic Compounds in the Situ Oil Shale Retort and Process Waters Using a Liquid Chromatograph Coupled with an Atomic Absorption Spectrometer as a Detector,
W82-05151 1511 5A

Sample Digestion Procedures for Simultaneous Determination of Arsenic, Antimony, and Selenium by Inductively Coupled Argon Plasma Emission Spectrometry with Hydride Generation,
W82-05360 1511 5A

Trace Determination of As(III) and As(V) in Natural Waters by Differential Pulse Anodic Stripping Voltammetry,
W82-05580 1511 5A

Adsorption of Arsenite and Arsenate on Amorphous Iron Hydroxide,
W82-06311 1512 5D

ARSENIC COMPOUNDS
Reduction, Methylation, and Incorporation of Arsenic into Lipids by the Marine Phytoplankton Dunaliella Tertiolecta,
W82-00239 1501 5B

Differential Pulse Polarographic Determination of Inorganic and Organic Arsenic in Natural Waters,
W82-02903 1506 5A

ARTESIAN CAPACITY
Calculations of the Capacity of Water Intakes with Consideration of Groundwater Leakage Through Steeply Dipping, Poorly Permeable Deposits,
W82-06617 1512 2F

ARTESIAN PRESSURE
Ground-Water Flow Systems and Stability of a Slope,
W82-04677 1510 2J

ARTIFCIAL RECHARGE
Experience with Borehole Recharge in The Lee Valley,
W82-03894 1509 4B

ARTIFICIAL LAKES
Meromixis in a Coastal Zone Excavation,
W82-02120 1505 2H

Water Budget and Projected Water Quality in Proposed Man-Made Lakes Near Estuaries in the Marco Island Area, Florida,
W82-02122 1505 5B

Biological Colonization of an Industrial Pond: Status After Two Decades,
W82-03772 1509 2H

ARTIFICIAL PRECIPITATION
Seeding-Opportunity Recognition in Winter Orographic Clouds,
W82-01005 1502 3B

ARTIFICIAL RECHARGE
Preliminary Data From a Series of Artificial Recharge Experiments at Stanton, Texas,
W82-00085 1501 7C

Artificial Groundwater Recharge,
W82-01110 1503 4B

The Meadowbrook Artificial-Recharge Project in Nassau County, Long Island, New York,
W82-03630 1508 4B

Artificial Basin Recharge,
W82-03745 1508 4B

Experience with Riverbank Filtration Along the Rhine River,
W82-04104 1509 5D

The Response of Groundwater to Artificial Recharge Schemes,
W82-04337 1510 4B

Artificial Recharge of Colorado River Water in Las Vegas Valley: Management Options and Potential Aquifer System Responses,
W82-06694 1512 6B

Field Study of Organic Water Quality Changes during Groundwater Recharge in the Palo Alto Baylands,
W82-06831 1512 5B

ASBESTIFORM
A Study of Biotic Transport of Asbestiform Fibers in Lake Superior,
W82-03950 1509 5B

ASBESTOS
A/C Pipe - Assessment or Advocacy,
W82-00070 1501 5F

Concentration and Size of Asbestos in Water Supplies,
W82-00262 1501 5B

Chrysotile Asbestos Fiber Removal During Potable Water Treatment. Pilot Plant Studies,
W82-00613 1502 5F

Interim Method for Determining Asbestos in Water,
W82-00741 1502 5A

The Activity of Environmental Samples in a Cell Culture Test for Asbestos Toxicity,
W82-01031 1502 5C

Chrysotile Asbestos Fibers in Drinking Water from Asbestos-Cement Pipe,
W82-01592 1503 5B

Determination of Mineral Fiber Concentrations in Fish Tissues,
W82-01822 1504 5C

Variations and Mechanisms of Asbestos Fibre Distribution in Stream Water,

W82-05271 1511 5D

BIOLOGICAL PROPERTIES
Aquatic Biology of the Redwood Creek and Mill Creek Drainage Basins, Redwood National Park, Humboldt and Del Norte Counties, California,
W82-02484 1505 4C

Biological Monitoring, Part IIA - Receiving System Functional Methods, Relationships and Indices,
W82-05013 1511 5A

BIOLOGICAL SAMPLES
Water Quality Management Studies, Lake Seminole, April-November 1978.
W82-00051 1501 6G

BIONESS, A New Design in Multiple Net Zooplankton Samplers,
W82-00210 1501 7B

Tracing Food Webs with Stable Hydrogen Isotopes,
W82-02021 1504 6G

Shallow-Depth Sedimentation of Biological Materials,
W82-02336 1505 5D

Biological Monitoring Part VI - Future Needs,
W82-03230 1507 5C

Selected Biological Characteristics of Streams in the Southeastern Uinta Basin, Utah and Colorado,
W82-06140 1512 7C

The Relative Abundance of Opossum Shrimp, Mysis Relicta, in Twin Lakes, Colorado Using a Benthic Trawl,
W82-06399 1512 6G

BIOLOGICAL TREATMENT
Engineering Assessment of Vermicomposting Municipal Wastewater Sludges,
W82-00385 1501 5E

Denitrification of Blackwater with Greywater,
W82-01225 1503 5D

Design and Cost Comparison of Biological Nitrogen Removal Processes,
W82-01544 1503 5D

Operational Problems with Rotating Biological Contactors,
W82-01549 1503 5D

Upgrading with Rotating Biological Contractors for Ammonia Nitrogen Removal,
W82-02673 1506 5D

Reduced Energy Usage with Biological Phosphorus Removal,
W82-02705 1506 5D

Evaluation of Temperature Effects in Aerated Biotreaters,
W82-03140 1507 5D

Demonstration of Anaerobic Biogas Digesters in Developing Countries. Part III: The Philippines,
W82-03226 1507 5D

A Comprehensive Study on the Biological Treatabilities of Phenol and Methanol--III. Treatment System Design,
W82-03568 1508 5D

The Use of Respirography in Biological Treatment Plant Control,
W82-04011 1509 5D

Temperature Effects on Biostabilization of Leachate,
W82-04044 1509 5D
